Career skills courses

Making English work for your career

Suite of career-building courses for international students

In a world where English language and business communication skills are keys to success, we now introduce our proven English career skills courses to a wider audience. These courses seamlessly integrate English language teaching with targeted business sector alignment, for an educational experience unique in the marketplace.

Why invest in career skills courses for your students?

- **Holistic Language Development:** Our courses go beyond conventional language teaching, focusing on the practical language skills necessary for success in specific business sectors. Students gain confidence and increase their skills in business conversation.
- **Career-Ready Skillset:** Equip your students with the tools they need to thrive in today's competitive job market. Our curriculum is designed to foster skills such as critical thinking, problem-solving, and effective collaboration—attributes that are highly valued by employers worldwide.
- **Global Perspective:** In an interconnected world, a global perspective is indispensable. Our courses expose students to diverse cultures, business practices, and communication styles, preparing them to navigate the complexities of the international business landscape.
- **With up to 30 contact hours per week,** these programmes provide an intensive study experience. By changing the afternoon sessions to a more business-scenario format, we transform the learning experience to keep engagement going!

How does it work?

Our courses are designed to help students become more effective communicators in business, and as such there are two learning experiences built into each course. In the mornings, students join an international General English class at a suitable level, along with students from other countries. In the afternoons, students are given a group career skills experience, learning and working together, often in teams or groups, to learn specific language skills for the world of work, placed in career scenarios and business sector contexts.

Students live with an English homestay host throughout their stay, travelling and shopping independently – true language immersion – in two of the world's greatest and most diverse English speaking cities: London, and Dublin.

Key course facts:

- Available for those aged 16+ years
- English level from Intermediate (B1) to advanced
- Typically, two week programmes
- Homestay accommodation
- Maximum class size of 15
- Course certificate on course completion

These courses are delivered face-to-face in London.

Custom courses

Custom programme development for vocational colleges

Bespoke career skills courses for college students.

If you would like to go beyond what is offered in our career skills courses, we can work with you to design a tailor-made programme around your students' needs. We have expertise in delivering custom courses aimed at specific vocational streams for students in vocational colleges, and can customise length of stay, English language tuition, accommodation type, and combine these with additional internships.

What makes a custom offer different?

Whilst the learning objectives remain the same - to help increase student confidence in English in career-relevant situations - our custom provision tailors the offer more closely to specific sectors and/or individual requirements.

Targeted learning design

By deploying VAK (visual, audio, and kinaesthetic) learning in carefully considered time-distribution course structures, we seek to maximise engagement, allowing for more intensive exposure than students might otherwise find intolerable.

Customer college input

We can consult with your college staff to ensure the topic areas we use are relevant/interesting to your students. Our purpose is not to supplement your vocational teaching, rather to use it as context for the English learning and practise to help your students to be effective business communicators in English.

Can we provide a course for you?

We're happy to arrange a consultation at no charge, to explore the possibilities.

If you would like to go beyond what is offered in our career skills courses, then we can develop a solution with you.
